

The Historic and Current Use of Cambridge 'Gault' Brick

Photo: Cambridgeshire Collection

Watts & Sons Brickworks, Newmarket Road, 1870

Anne Cooper
Director, AC Architects Cambridge Ltd

Anne has just completed a course in Historic Building Conservation at the University of Cambridge's Institute of Continuing Education. She is particularly interested in exploring how Building Conservation policy responds to the loss of principal materials which have shaped local architecture.

Looking specifically at the use and manufacture of Cambridge 'Gault' bricks up to the present day, she will outline the approaches that have been applied in response to their decline and loss of manufacture. She will also identify changes in attitude to new development in the City and the extension and repair of existing Cambridge 'Gault' brick buildings in the light of relevant philosophical developments in Building Conservation policy, principles and legislation.

Wednesday, 22 July, 2015
CAR Offices, 25 Gwydir Street
Drinks from 5.30 p.m. Talk at 6.00 p.m.

Please let Anna know by Tuesday, 21 July, if you will be attending (anna.petrosyan@carltd.com).
