

## EdenApp An Environmental Analysis Tool

Dr Ola Uduku, *Reader in Architecture*  
Gillian Treacy, *PhD Candidate*

*The Edinburgh School of Architecture and Landscape Architecture  
University of Edinburgh*

Gillian Treacy and Ola Uduku, in collaboration with app developers at University of Edinburgh, have created EdenApp, a mobile phone application designed to teach students how to measure and interpret daylight factor and 'useful daylight illuminance' readings in buildings. This app is the initial step in developing a suite of environmental analysis teaching tools and apps for a wider range of applications and a broader audience base. They will demonstrate the lighting app, report on student views, and discuss the challenge that its evolution and marketing to future audiences is likely to present.

Wednesday, 27 January, 2016  
CAR Offices, 25 Gwydir Street  
Drinks from 5.30 p.m. Talk at 6.00 p.m.

Please let Anna know by Tuesday, 26 January, if you will be attending ([anna.petrosyan@carltd.com](mailto:anna.petrosyan@carltd.com)).
