

Reflections from Malmo

Complex: The Twisted Tower

Simple: Sustainable Drainage Systems

Adam Broadway

*CAR Associate
Managing Director, Instinctively Green*

Instinctively Green works on a variety of projects from large scale masterplans to delivering consultation and engagement events. Established in 2009, IG also provides housing development and project management advice.

People often ask "Where is the most sustainable place?" Too often the reply is not in the UK, but in Europe. Malmo, famous for its Western Harbour re-development, is one quoted example. Earlier this year Adam was invited by the Building and Social Housing Foundation to join a study tour to find out how the city has earned such a reputation and see first hand the various examples of sustainability. This talk will offer a personal reflection of Malmo supported by plenty of images to enable us to discuss why it is the Swedes can do it and we can't.

Wednesday, 27 July, 2011

CAR Offices, 25 Gwydir Street
Drinks from 5.30 p.m., Talk at 6:00 p.m.

Please let Maria know by Tuesday, 26 July, if you will be attending (maria.sylvester@carltd.com).
